

IFM²E '18

12th International Forum of Mechanical and Mechatronics Engineering

IIOT and mechanical engineering:

Integrating the sustainability perspective into innovation processes

November 22-23, 2018
HfWU Nürtingen-Geislingen
Nürtingen, Germany

The International Forum of Mechanical and Mechatronic Engineering (IFM²E) aims to bring the educators and representatives of industry together to develop competitiveness in European Mechanical and Mechatronic Engineering education and industry.

Topics:

- Facilitating and driving university – business **cooperation**
- Developing knowledge alliances and **strategic partnerships**
- New approaches in engineering education that stimulate **creativity** and **innovation**

Organized by:

**ISR - Institute for International Research on Sustainable Management
and Renewable Energy**
